Period: _____

Graphing Speed

On the graph below, plot the following data:

Distance from start y-axis	10m	50m	50m	100m	110m	120m
Time from Start x-axis	10s	40s	60s	80s	100s	140

On the back, describe a possible explanation for what is happening in the graph. Example: A ball rolling down a hill. But give more detail. Think about the speed.
