### Review for Test #1

Use the letters on the map above to answer the following questions. There may be more than one correct answer to some questions, so your explanation is important.

1. In which location would I find the most dangerous volcanoes? \_\_\_\_\_ Describe the type of plate boundary at this location. \_\_\_\_\_  
\_\_\_\_\_
2. At which two locations would I find a divergent plate boundary? \_\_\_\_\_ & \_\_\_\_\_ These boundaries produce a very specific type of valley, it is called a \_\_\_\_\_ valley. Describe the valley. \_\_\_\_\_  
\_\_\_\_\_
3. At which location would I find non-volcanic mountains? \_\_\_\_\_ What type of plate boundary is here? \_\_\_\_\_ Why does this not form volcanoes? \_\_\_\_\_  
\_\_\_\_\_
4. At which location are tsunami-producing earthquakes likely? \_\_\_\_\_ How does an earthquake produce a tsunami? \_\_\_\_\_  
\_\_\_\_\_ Tsunamis are produced almost exclusively from which type of faults (Normal, Reverse, or Thrust)
5. Which location is unlikely to have volcanoes or earthquakes? \_\_\_\_\_ Why? \_\_\_\_\_  
\_\_\_\_\_
